
MAS GOLD Receives Saskatchewan Grant & Completes Winter Drill Program

Vancouver, March 26, 2019 - **MAS Gold Corp.** ("MAS Gold" – TSX-V: **MAS**) is pleased to announce that it will receive \$50,000 in grant funding from the Government of Saskatchewan to support its gold-focussed exploration activities in the La Ronge Greenstone Belt area of the province.

"With a focus on gold in the La Ronge belt, MAS Gold has developed a strong exploration strategy built upon great geology in the proactive mining jurisdiction of Saskatchewan." said David Tupper, VP Exploration for MAS Gold. "We are pleased to receive this grant provided through the government's \$750,000 Targeted Mineral Exploration Incentive program, which supports exploration companies like MAS Gold in their search for base and precious metals in the province."

Mineral Development Strategy funding is again available in the 2019-2020 provincial budget and is one of the many reasons that since 2014, Saskatchewan continues to rank in the top three jurisdictions in the world for its Investment Attractiveness Index according to the Fraser Institute's annual Survey of Mining Companies. MAS Gold intends to apply for further grants.

Winter Drill Program Totalling 3,488 Metres Completed

MAS Gold, as operator of the La Ronge South Gold Joint Venture with Golden Band Resources Inc. has successfully completed this winter's core drilling programs at the Point and North Lake gold prospects located about 60 kilometers northeast of La Ronge, Saskatchewan. At the Point prospect, thirteen drill holes totaling approximately 1,947 metres were completed and at the North Lake prospect 10 holes totalling 1,541 metres were drilled. The drill programs were designed to provide confirmation of historic drill results, infill and step-out drill intercepts and core for metallurgical testing.

Initial gold assay results from three drill holes at the Point gold prospect have been reported (see MAS Gold news releases of February 21 and February 27, 2019). Additional assay results for the remaining 20 holes will be released when received from TSL Laboratories Inc. of Saskatoon, SK.

About MAS Gold Corp.

MAS Gold Corp. (formerly Masuparia Gold Corporation) is a Canadian mineral exploration company focused on exploration projects in the prospective La Ronge Greenstone Belt of Saskatchewan, Canada. MAS Gold's Saskatchewan projects include the advanced-stage Greywacke deposit, which hosts high-grade gold-bearing zones with a National Instrument 43-101 compliant (at a cut-off grade of 5 grams gold/tonne) Indicated Mineral Resource of 255,500 tonnes at 9.92 grams gold/tonne plus an Inferred Mineral Resource of 59,130 tonnes at 7.42 grams gold/tonne. MAS Gold's NI 43-101 Technical Report of June 1, 2016 concerning the Greywacke gold deposit is available on [SEDAR](#) and on MAS Gold's website: <http://www.masgoldcorp.com> .

On Behalf of the Board of Directors of MAS Gold Corp.
